For a research paper, what is a Bibliography, References, or Works Cited page? (Check all that apply):

- A list of the sources that were found when the writer researched his/her topic.
- A list that shows which sources were included and documented in the paper.
- A list that shows the page of your paper where you quoted the sources used.
- A list that shows titles of books on the same subject.

You want to use some of the information found in a magazine article for your research paper. Are you required to cite your source in these situations? (Mark each "yes", "no" or "not sure"):

	Yes	No	Not sure
When you copy a complete paragraph.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
When you paraphrase a main point in your own words.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
When you quote a sentence from the article.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Is this a valid reason to cite the sources you used in a research paper? (Mark each "yes", "no" or "not sure"):

	Yes	No	Not sure
Readers of your paper may want to find and read the sources you cite.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
U.S. Copyright law states that research papers must contain such a list.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
You could be accused of plagiarism if you don't cite your sources properly.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Please read the following sample from a student paper, followed by the original source material. Determine if there is plagiarism in the student version.

Student Version

When major changes are initiated in organizations, "... there is often the implicit assumption that training will 'solve the problem.' And, indeed, training may solve part of the problem." (Dormant, 1986, p. 238).

References:

Dormant, D. (1986). The ABCDs of managing change. In *Introduction to Performance Technology* (p. 238-256). Washington, D.C.: National Society of Performance and Instruction.

Original Source Material:

Major changes within organizations are usually initiated by those who are in power. Whether the appointed change agent is in training development or not, there is often the implicit assumption that training will "solve the problem." And, indeed, training may solve part of the problem.

References:

Dormant, D. (1986). The ABCDs of managing change. In *Introduction to Performance Technology* (p. 238-256). Washington, D.C.: National Society of Performance and Instruction.

Is the student version plagiarized?

- Yes
- No
- Not Sure

Why or why not?

Which of the following characteristics apply to these three types of publications? (Check all that apply):

	Written for a Scholarly Audience	Written for a General Audience	Peer-Reviewed
News Magazines (Time, Newsweek)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Scholarly Journals (American Sociological Review, the Journal of the American Medical Association)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Entertainment Magazines (Us, Entertainment Weekly)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

You are doing research for a paper about the origins of hip hop music. Which periodical (magazine, newspaper, or journal) is most likely to contain information that will be most useful for your research?

- New York Times
- International Journal of Cultural Studies
- People
- Entertainment Weekly

Why did you select this title?

You are writing an 8 page research paper for your science class on how human cloning works. You have searched your library's online databases. Which of these listed results would be the most likely to contain useful and appropriate information for your research paper?

- "Human Cloning and Science Fiction Films." Entertainment Weekly
- "Cloning Humans Debated in the Illinois Senate." Chicago Tribune
- "Copying Humans." Cosmopolitan
- "Human Cloning." Scientific American

Why did you select this title?
